

# HEALTHAPP AUTOMATION VERIFICATION MODULE – PL1

## Pre-requisite:

As soon as you import project in eclipse, update the project using maven update option as below. This is to resolve issue if any maven dependency not downloaded properly:

1. Right click on project : Go to “Maven” : Select “Update Project”

2. In Update Maven Project Box Select “Force Update of Snapshots/Releases” and click OK

### Template Code Structure:

- a. Below are the packages and files you will be required to work upon.
- b. Other Files and packages you can ignore.
- c. In other Files and packages do not do any changes. It would affect your evaluation.
- d. You are not required to work in "Test" Folder. Files there are non-editable. Editing those files and trying to save them will throw error and would affect your evaluation.

Package	Class/File	Description
src/main/java/coreUtilities/utis/	FileOperations.java	<ol style="list-style-type: none"><li>1. Contains methods to read from json file.</li><li>2. Method is in templated form.</li><li>3. <b>You will be required to implement these methods as very first activity, because even URL to navigate to, is read using these methods.</b></li></ol>
/src/main/java/pages	verification_page.java	<ol style="list-style-type: none"><li>1. All core activities (mentioned in list above) to be performed here.</li><li>2. The comments associated with each templated method here describe the expectation.</li><li>3. You can define locators and xpath here.</li><li>4. Declare any variable/object you need to share data/status between different methods.</li><li>5. Do not modify the signature of methods declared here.</li><li>6. You can create additional supportive common methods in CommonEvents class.</li></ol>
/src/main/resources/	Config.json	URL to navigate to. Already URL is defined here

	expected_data.json	Contains data to fill in form\
/src/main/java/coreUtilities/utis	CommonEvents.java	<ol style="list-style-type: none"> <li>1. Contains all common activities.</li> <li>2. Certain templated common method declared here.</li> <li>3. You implement them as per your need.</li> <li>4. You can add any additional method for common activity here</li> </ol>
	Testng.xml	Execution needs to kick started from TestNG xml

## PROBLEM STATEMENT

Need to automate the following activities using Selenium + Java.

## Key Activities to implement:

#	Summary	Action	Expected Result
1	Verify the verification module is present or not	<ol style="list-style-type: none"> <li>1. go to URL : <a href="https://healthapp.yaksha.com/">https://healthapp.yaksha.com/</a></li> <li>2. login as valid credential (<b>username : admin , password : pass123</b>) and click on "SignIn" Button</li> <li>3. Scroll down menu till verification</li> <li>4. Click on the verification</li> </ol>	Verification module should be present
2	To ensure that all designated sub-modules(Displayed after expanding verification module) in left panel are correctly displayed under the Verification module.	<b>Preconditions:</b> User should be logged in and it is on verification module <b>Steps:</b> Click on the verification Module drop-down arrow	All sub-modules should be displayed correctly. Expected Sub modules are : Inventory, Pharmacy
3	Verify the presence of Requisition tab in inventory section with all fields	<b>Preconditions:</b> The user must be logged into the health system. <b>Steps:</b> <ol style="list-style-type: none"> <li>1. Ensure the user has navigated to the Verification module.</li> <li>2. Click on the "Inventory" option to access its features.</li> <li>3. Within the Inventory section, locate and click on the "Requisition" tab.</li> <li>4. following items should be present :</li> </ol> <b>Tabs:</b> Requisition, Purchase Request, Purchase Order, and GR Quality Inspection <b>Buttons:</b> Ok, Print, First, Previous, Next, Last, and View. <b>Fields:</b> Check for a Search bar.	The Requisition tab should be easily accessible and contain all listed components

		<p><b>Dropdown Menus:</b> Verify dropdown menus for Requisition Status, Date range.</p> <p><b>Status Radio Buttons:</b> Ensure radio buttons for filtering requisitions by status (Pending, Approved, Rejected, All) are available and selectable.</p> <p><b>Date Pickers:</b> From and To date pickers to specify date ranges.</p> <p><b>Tooltip:</b> Verify a tooltip appears when hovering over star icon.</p>	
4	To ensure seamless navigability between the Inventory and Pharmacy sections within the Verification module.	<p><b>Preconditions:</b> The user must be logged and located within the "Requisition" tab under the Inventory section of the Verification module.</p> <p><b>Steps:</b></p> <ol style="list-style-type: none"> <li>1. Click on the inventory</li> <li>2. Click on the pharmacy</li> </ol>	User should navigate to the pharmacy section from the inventory section
5	To confirm that users can seamlessly navigate from the Requisition sub-tab to the Purchase Order sub-tab within the Inventory section of the Verification module.	<p><b>Preconditions:</b> The user must be logged into the health system. The user is currently within the Verification module, specifically under the Inventory section.</p> <p><b>Steps:</b></p> <ol style="list-style-type: none"> <li>1. Ensure the user is on the Requisition sub-tab within the Inventory section.</li> <li>2. From the Requisition sub-tab, locate and click on the "Purchase Order" sub-tab.</li> </ol>	The transition to the "Purchase Order" sub-tab should be smooth and error-free, with the system quickly displaying the Purchase Order interface and related functionalities.
6	To confirm that users can successfully use date filters to search for data within the Verification module by selecting specific date ranges, and to verify that the search results reflect data from the selected time period.	<p><b>Preconditions:</b> The user must be logged into the health system. The user is currently on Requisition tab of Inventory sub module of the Verification module.</p> <p><b>Steps:</b></p> <ol style="list-style-type: none"> <li>1. Click on the "From" date, Choose a date that is 7 days back from the current date.</li> <li>2. Click on the "To" date, Choose the current date from the calendar that appears.</li> <li>3. Click the "OK" button to apply the selected date range.</li> </ol>	The 'Requested on' column date must fall within the date selected by the user.
7	To ensure that when a user hovers the mouse over the "Star" icon within the Requisition tab of the Inventory submodule in the Verification module, a tooltip appears.	<p><b>Preconditions:</b> The user must be logged into the health system. The user is located within the Requisition tab of the Inventory submodule in the Verification module, where the "Star" icon is visible.</p> <p><b>Steps:</b></p> <ol style="list-style-type: none"> <li>1. <b>Locate the "Star" Icon:</b> Identify the "Star" icon within the Requisition tab.</li> <li>2. <b>Hover Over the "Star" Icon:</b> Move the mouse cursor over the "Star" icon and hold it there without clicking. This action should trigger the display of a tooltip.</li> <li>3. <b>Verify Tooltip and Text:</b> Verify that the tooltip contains the exact text <b>"Remember this date"</b></li> </ol>	Tooltip should be present when hover the mouse on star with text <b>"Remember this date"</b> .

8	To verify that the system retains selected date ranges within the Verification module when navigating between the "Pharmacy" and "Inventory" tabs, ensuring that user inputs are preserved across different sections for consistent user experience.	<p><b>Preconditions:</b> The user must be logged into the health system. The user is located within the Requisition tab of the Inventory submodule in the Verification module</p> <p><b>Steps:</b></p> <ol style="list-style-type: none"> <li>1. <b>Set 'From' Date:</b> Select a date 50 days older than the current date.</li> <li>2. <b>Set 'To' Date:</b> Choose current date as the to date for the date range.</li> <li>3. After setting the dates, click on the "Star" icon.</li> <li>4. Click on the "OK" button to apply the selected date range.</li> <li>5. Navigate to the "Pharmacy" tab.</li> <li>6. <u>Navigate back to the "Inventory" tab.</u></li> </ol>	Upon returning to the "Inventory" tab from the "Pharmacy" tab, the previously selected dates ("FROM" and "TO") should be remembered and displayed correctly.
9	To ensure that selecting the "Last one Month" option from the date range dropdown accurately filters data, displaying records that fall within the last month from the current date in the 'Requested on' column.	<p><b>Preconditions:</b> The user is located within the Requisition tab of the Inventory submodule in the Verification module</p> <p><b>Steps:</b></p> <ol style="list-style-type: none"> <li>1. <b>Access Date Range Dropdown:</b> Locate and click on the date range button within the Verification module.</li> <li>2. Select 'Last One Month' Option From the dropdown menu.</li> <li>3. After selecting the desired date range, click the "OK" button to apply this filter to the data being viewed.</li> </ol>	After applying the filter by clicking "OK", the system should refresh the data displayed, ensuring only records from the last month are shown in the 'Requested on' column or relevant data field.
10	To ensure that the status radio buttons ("Pending", "Approved", "Rejected", "All") in the Verification module are present, functional, and allow for filtering records based on their respective statuses.	<p><b>Preconditions:</b> The user is located within the Requisition tab of the Inventory submodule in the Verification module.</p> <p><b>Steps:</b></p> <ol style="list-style-type: none"> <li>1. Select 'Pending' Radio Button.</li> <li>2. Select 'Approved' Radio Button.</li> <li>3. Select 'Rejected' Radio Button.</li> <li>4. Finally, click on the "All" radio button to reset the filter and show all records, regardless of their status.</li> </ol>	The "Pending" radio button should be Selectable The "Approved" radio button should be Selectable The "Rejected" radio button should be Selectable The "All" radio button should be Selectable
11	To confirm that selecting the 'Active' status from the Requisition Status dropdown effectively filters records to display only those with an 'Active' status in the 'Req. Status' column.	<p><b>Preconditions:</b> The user is located within the Requisition tab of the Inventory submodule in the Verification module.</p> <p><b>Steps:</b></p> <ol style="list-style-type: none"> <li>1. <b>Access Dropdown:</b> Click on the Requisition Status dropdown.</li> <li>2. <b>Select 'Active':</b> Choose the 'Active' option from the dropdown.</li> <li>3. <b>Verify Filtering:</b> Ensure records in the 'Req. Status' column display as 'Active'.</li> </ol>	pon selection, only records with an 'Active' status should be visible, confirming the dropdown's functionality.

12	Ensure the 'View' button functions correctly, allowing users to access detailed requisition information.	<b>Preconditions:</b> The user is located within the Requisition tab of the Inventory submodule in the Verification module. <b>Steps:</b> <ol style="list-style-type: none"> <li>1. <b>Select 'All' Status:</b> Activate the 'All' radio button to show all records.</li> <li>2. <b>Set Date Range:</b> Set 'FROM' date to "31-12-2023" and 'TO' date to the current date.</li> <li>3. <b>Apply Date Filter:</b> Click 'OK' to filter records.</li> <li>4. <b>Use 'View' Button:</b> Click 'View' in a specific row's action column.</li> </ol>	Clicking 'View' should navigate to the "Check and Verify Requisition" page, showing detailed information for that row.
13	Verify Record Count Matches in Purchase Request	<b>Pre condition:</b> User should be logged in and it is on Requisition tab in verification module <b>Steps:</b> <ol style="list-style-type: none"> <li>1. Click on inventory section.</li> <li>2. Click on the "Purchase Request" sub-tab.</li> <li>3. Find and select the "All" radio button to view all records.</li> <li>4. Fetch and Verify Result Counts</li> </ol>	The result count displayed at the bottom of the page should match the total record count.
14	Verify to scrolling of page	<b>Pre condition:</b> User should be logged in <b>Steps:</b> <ol style="list-style-type: none"> <li>1. Verify "Pending" radio button is visible</li> <li>2. Scroll all the way to the bottom of the page</li> <li>3. Verify "Previous" button is visible</li> <li>4. Scroll all the way to the top of the page</li> <li>5. Verify "Pending" radio button is visible</li> </ol>	The user should be able to scroll up and down
15	Verify the required "Item" field in the Purchase Request section under the Inventory module.	<b>Precondition:</b> User should be logged in and on the Verification module <b>Steps:</b> <ol style="list-style-type: none"> <li>1. Navigate to the "Internal" section under Inventory.</li> <li>2. Click on "Purchase Request".</li> <li>3. Click on the "Create Purchase Request" button.</li> <li>4. Click on the "Request" button.</li> </ol>	The 'Item Name' field should display a red border along with a warning message beneath it stating, 'Item is required.'

**NOTE:** "Please do not delete any file in the src folder. But you are free to add any other file".

### Expectations:

- 1) Learners should write automation script using Java and selenium to automate all the steps in the above question. In other words, automation script should perform all

mentioned steps.

- 2) Learners should not use any tools to create the xpath. They should develop the xpath/cssselector on their own.

---

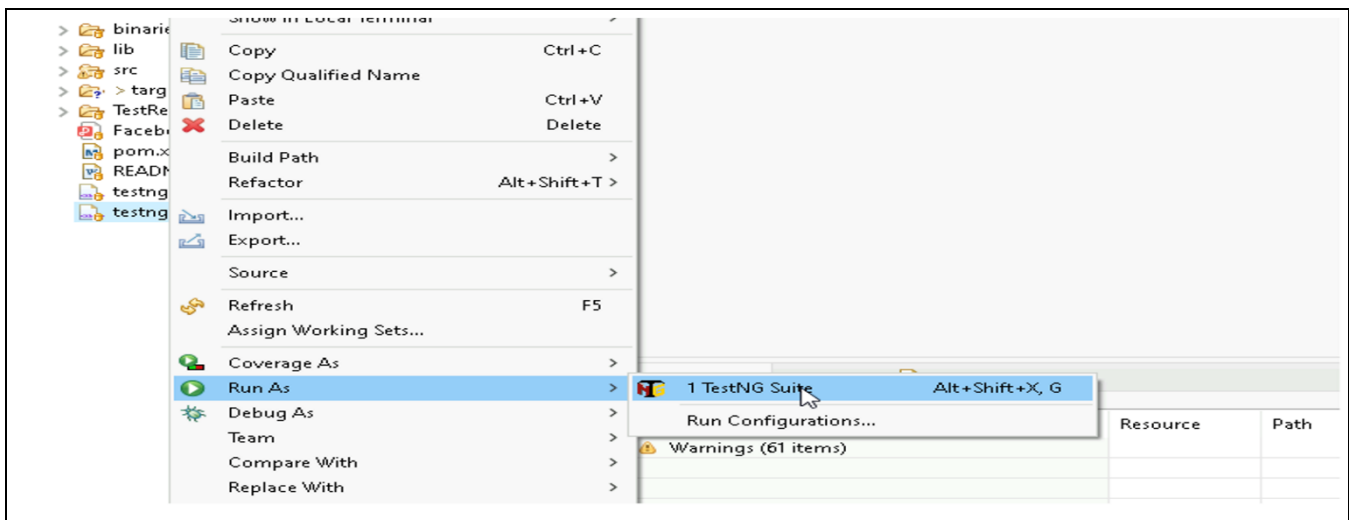

## IMPLEMENTATION/FUNCTIONAL REQUIREMENT

### 1.1 CODE QUALITY/OPTIMIZATIONS

1. Associates should have written clean code that is readable.
2. Associates need to follow SOLID programming principles.

## EXECUTION STEPS TO FOLLOW

1. You are mandatory required to run test cases for applications before final submission. Without which project evaluation will not happen.
2. You can launch test cases any time as follows: Right click on testng.xml and run TestNGSuite.

3. Before final submission, you are also required to push your code to GIT. Following are the steps to follow:

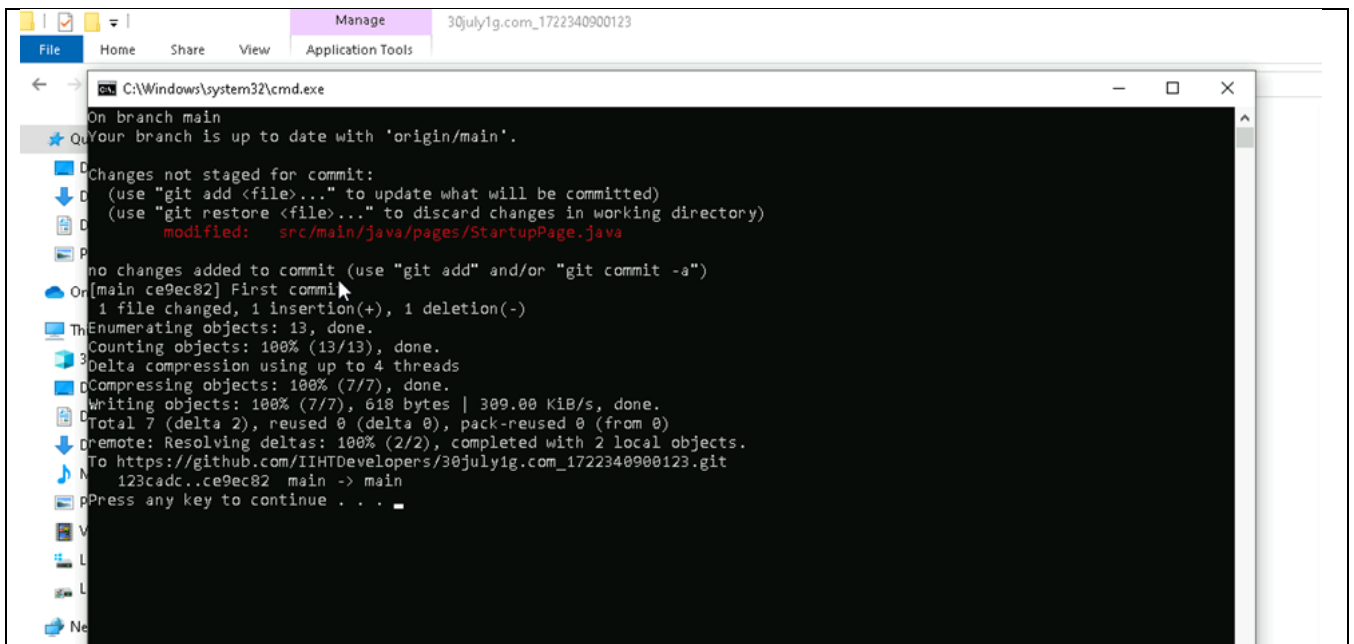

In your project folder, you will find a batch file named `git_commands`

Double-click the batch file to run it. It will run the commands to push your code to GIT.

## HealthApp Automation – Verification

```
C:\Windows\system32\cmd.exe

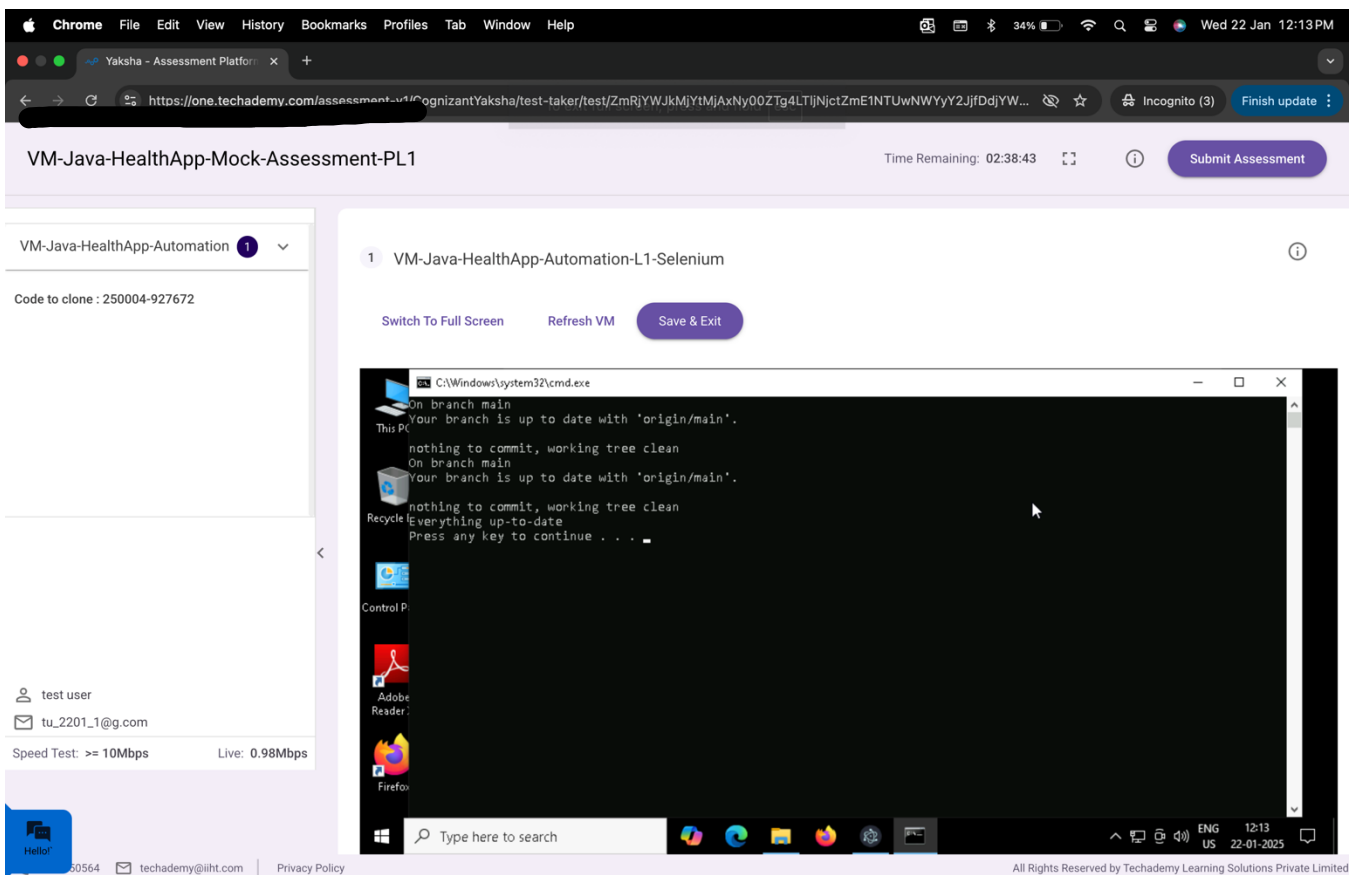

On branch main
Your branch is up to date with 'origin/main'.

Changes not staged for commit:
  (use "git add <file>..." to update what will be committed)
  (use "git restore <file>..." to discard changes in working directory)
        modified:   src/main/java/pages/StartupPage.java

no changes added to commit (use "git add" and/or "git commit -a")
Or[m]ain ce9ec82] First commit
1 file changed, 1 insertion(+), 1 deletion(-)
Enumerating objects: 13, done.
Counting objects: 100% (13/13), done.
Delta compression using up to 4 threads
Compressing objects: 100% (7/7), done.
Writing objects: 100% (7/7), 618 bytes | 309.00 KiB/s, done.
Total 7 (delta 2), reused 0 (delta 0), pack-reused 0 (from 0)

   123cadc..ce9ec82  main -> main
Press any key to continue . . .
```

Once the code is pushed to git, you can go for the final submission of the assessment.

- Press escape to come out of Fullscreen mode.
- Submit the assessment.

The screenshot shows a web browser window with the URL <https://one.techademy.com/assessment-v4/IncognizantYaksha/test-taker/test/ZmRjYWJkMjYtMjAxNy00ZG4LTjNjctZmE1NTUwNWYyY2JfDdjYW...>. The page title is "VM-Java-HealthApp-Mock-Assessment-PL1". The interface includes a sidebar with "VM-Java-HealthApp-Automation" and a code to clone: "250004-927672". The main area shows a VM environment with a terminal window displaying the same Git output as the first image. The terminal output is: 

```
C:\Windows\system32\cmd.exe

On branch main
Your branch is up to date with 'origin/main'.

nothing to commit, working tree clean
On branch main
Your branch is up to date with 'origin/main'.

nothing to commit, working tree clean
Everything up-to-date
Press any key to continue . . .
```

After the successful submission of the assessment, you will get a confirmation message displayed on your screen.

## HealthApp Automation – Verification
